- EF SET English Certificate – 64/100 (C1 Advanced)
- Programación con JavaScript – Fundación Telefónica
- Diseño, desarrollo y publicación de una página web – Domestika
- JavaScript Algorithms and Data Structures – freeCodeCamp

Work History

Frontend Developer, COHENCTI, Colombia (Remote) March 2026 – Present

- **Next.js, React, TypeScript, Tailwind CSS, and Server Actions** to rebuild core bank website flows, cutting client-side JavaScript so pages loaded faster for customers.
- **Redux** to centralize state across multi-step banking flows, reducing bugs and making the checkout process easier to debug for the team.
- **Vitest** to add automated unit and integration tests, catching issues before release so the redesigned site stayed reliable for users.
- **GA4 and A11Y (accessibility) standards** to track how customers used the site and make sure the redesign was usable by people with disabilities.
- **GitHub Actions and clean architecture principles** to automate deployments and keep the codebase organized so new features could ship without breaking existing ones.

Frontend Developer, Cressco, Bogotá, Colombia August 2023 – March 2026

- **Python, LangChain (RAG), React, and TanStack Query** to build an AI chatbot for a bank's blog, letting customers ask questions in plain language instead of searching articles manually.
- **React and Redux** to fix critical bugs on a legacy platform used by artists and designers, restoring a usable experience for the site's existing customers.
- **n8n, and the Airbnb and Booking.com APIs** to build automated booking and support flows for hospitality clients, cutting the manual work their teams had to do for every reservation.
- **React Native, Expo, TypeScript, and NativeWind** to build a food-discovery mobile app, letting people across Europe find and review places from their phones.

Frontend Developer (Freelance), Kiddo™ Estudio, Medellín, Colombia 2023 – Present

- **Astro, React, Sanity, and GSAP** to build Kiddo Estudio's portfolio website, giving the agency a polished site to show prospective clients their past work.

- **React, TypeScript, and Tailwind CSS** to rebuild a client's landing page after their WordPress site was hacked, closing the security holes so they could safely present their services again.

Frontend Developer, 300bees, Medellín, Colombia

June 2022 – August 2023

- **HTML, CSS, JavaScript, WordPress, and Elementor** to build marketing websites for clients, giving them an easy way to update their own pages without hiring a developer each time.
- **GSAP, GA4, and GTM** to add animations and track site behavior, giving clients a clearer picture of how visitors used their pages.
- **PHP and custom APIs** to extend WordPress with features clients needed that off-the-shelf plugins couldn't handle.
- **Shopify** to manage client stores, improving the checkout experience and making it easier for customers to find products through better SEO.

Technical Skills

- **Languages:** JavaScript (ES6+), TypeScript, Python, HTML5, CSS3, SQL
- **Frameworks:** React.js, Next.js, React Native (Expo), Preact, Astro, Svelte, Gatsby
- **State Management:** Zustand, Redux, TanStack Query, React Query, React Context API
- **Styling:** Tailwind CSS, NativeWind, Bootstrap, Sass, Styled Components
- **Testing:** Vitest, Jest, Cypress, React Testing Library, Detox
- **AI & Automation:** LangChain (RAG), n8n (AI & rule-based workflows), Chatbot development
- **Backend:** Flask (Python), Node.js, Server Actions
- **Databases & ORM:** MySQL, PostgreSQL, MongoDB, Prisma
- **APIs:** REST, GraphQL (Apollo Client), third-party integrations (Airbnb, Booking.com)
- **E-Commerce & CMS:** Shopify (Hydrogen), WooCommerce, WordPress, Elementor, Sanity, Strapi
- **Analytics & A11Y:** GA4, GTM, Accessibility (A11Y / WCAG) best practices
- **DevOps & Tools:** Git, GitHub, GitHub Actions, Docker, AWS, Vite, Webpack, Rspack
- **Methodologies:** SCRUM, Kanban, Clean Architecture
- **Collaboration:** Figma, Notion, Slack, Linear

Additional Projects

- Book Filter – React + Vite technical assessment
- Pepsi Website Remake – HTML, CSS, JS
- Chipboys Landing Page – Product marketing site
- IMSYS – Measurement system development
- Weather App – API-driven weather dashboard
- Dictionary App – React + React Query + API
